

As a subscriber to XM Satellite radio, I pay for their vairous services they provide. It is not free. Everyone in the United Sates of America has an opportunity to subscribe and receive the signal provided by XM Satellite radio. I personally like the access to the instant traffic and weather XM Satellite Radio provides due to the many places I travel. This service is of great benefit to how I conduct my daily business. I do not live in any city that is covered by the instant traffic and weather, but I conduct business in several of those areas. The service helps with the travel and scheduling in those cities. Again, this service is not free, but it's value is more than worth the monthly fee I pay.

Regards,

James D. Scott
